

Week 3 – All About Data

Journal entries

All-student prompts

All students should reflect on and respond to the following prompt(s):

Prompt 5: *How is the internship meeting or not meeting your expectations/objectives and why? Do you have control of this? Explain.*

The internship has met my expectations so far. I came into this experience expecting to learn all about the company, their products, various departments, and culture, and that's what has happened so far. The internship has attempted to capture all aspects of the company and not just the technical side. The main part of the internship that has not met expectations is the format/style of learning. There has been more sitting down and listening to zoom calls than I expected, and would appreciate more interactive experiences. It could just be me though, as my mindset largely indicates if I enjoy something or not.

Prompt 6: *How has this experience affected or changed your career/college plans?*

The internship has slightly changed my career plans. Before the internship, I didn't really know what I wanted my career to focus on, and I still don't know what I will do after highschool. The internship has mainly given me insight into how certain jobs look like, which could influence what I do with my career later. For now though, no main impacts.
