

Week 2 – Technical Labs

Journal entries

All-student prompts

All students should reflect on and respond to the following prompt(s):

Prompt 3: How has your classroom experiences prepared you for the internship? What do you wish you had learned prior to the internship?

My classroom experiences have prepared me for this internship by teaching me some basic technical skills like Python, Java, HTML, CSS, and JS. They've also taught me how to be a good collaborator and work well with my peers. Another thing I've picked up from my classroom experiences is that a good learner has an open mindset and is always ready to learn. I wish that I had learned more about the company's products prior to the internship, especially the specifics of automation, containers, and virtual machines.
