

Week 2 – Technical Labs

Journal entries

All-student prompts

All students should reflect on and respond to the following prompt(s):

Prompt 3: *How has your classroom experiences prepared you for the internship? What do you wish you had learned prior to the internship?*

My classroom experiences helped me get a basic grasp of how technology works. Enrolling in AP Computer Science Principles last year, I learned about python coding, as well as machine learning and AI training. This gave some baseline knowledge on some topics involving the technology here at red hat. The classroom provided overall background knowledge that was general and could be added onto. One thing I wish I knew before the internship started was the prevalence of linkedin. Before the internship, I didn't have an account and was not aware of how significant and important it is, and I wish I knew the opportunities that linkedin and other networking platforms provide.

Additional Wake County prompts

Students completing the internship program for Wake County schools must also complete the following prompts IN ADDITION to the 'All-student prompts'

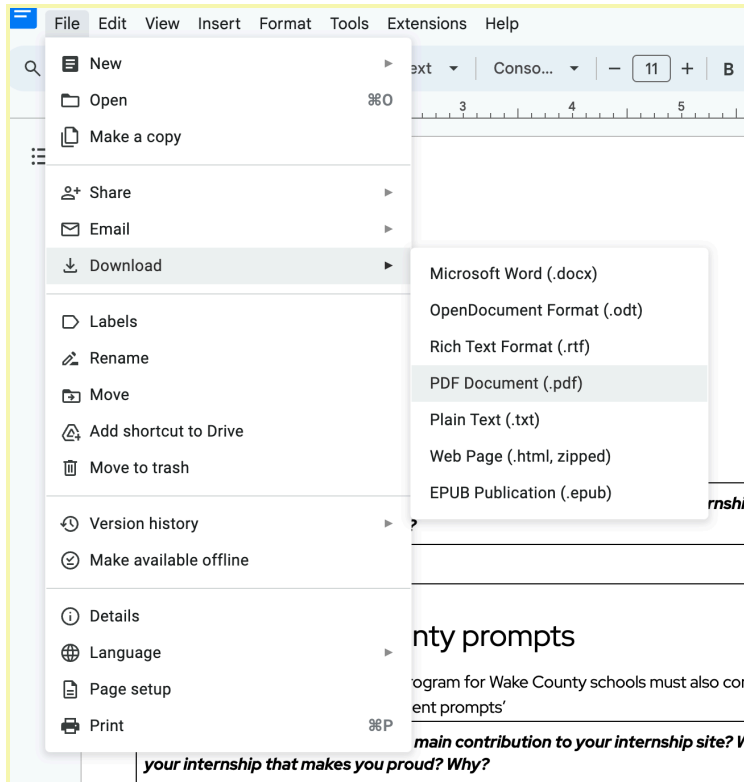

Prompt 4: *What do you feel is your main contribution to your internship site? What have you done at your internship that makes you proud? Why?*
