# Week 2 – Technical Labs

Journal entries

## All-student prompts

All students should reflect on and respond to the following prompt(s):

**Prompt 3:** *How has your classroom experiences prepared you for the internship? What do you wish you had learned prior to the internship?*

Add your response here

Some classroom experiences that prepared for this internship include communication, active listening, and the ability to engage in activities. Participating in similar events throughout school has greatly impacted my skills and experiences that I've displayed through this internship. One thing I wish I had learned prior to this internship would definitely be the importance of networking. This is something I'd learned at RedHat but I believe having this previous knowledge would have helped me think of better ideas or taken advantage of certain opportunities prior to this internship.

## Additional Wake County prompts

Students completing the internship program for Wake County schools must also complete the following prompts IN ADDITION to the 'All-student prompts'

**Prompt 4:** *What do you feel is your main contribution to your internship site? What have you done at your internship that makes you proud? Why?*
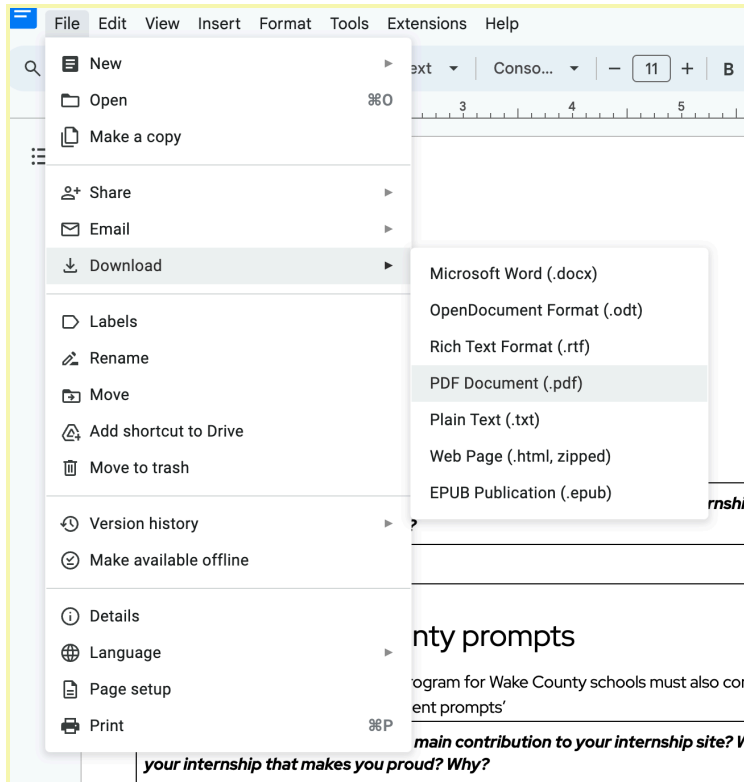

Add your response here

I believe from a personal perspective myn main contribution was trying to engage me and my team to connect and network like taking initiative in conversations and participating in gatherings/events happening throughout the building to build a network with others.

# Export + contribute your reflection

1. Once you've filled out the above prompts, export this doc as a PDF. Note: make sure you rename the file to be in the format `[Firstname Lastname] Week 2 Journal Entries`

2. Now that you have a PDF of this week's reflections saved locally to your laptop, you should contribute the PDF to your personal GitHub dropbox area in our shared repo.
