Week 1 – Career Development

Journal entries

All-student prompts

All students should reflect on and respond to the following prompt(s):

Prompt 1: *Describe your orientation of the workplace and include the following: when did it occur, who did you meet with, and what are three key things you learned during the orientation?*
Orientation occurred in the first week of our internship. Some takeaway things during this week included learning about the history of the company, seeing parts of the company that are unheard of like the security team and learning about the various responsibilities and components that make up Redhat.

Prompt 2: *Define the purpose of the business/organization – what they do, structure, who are their customers, etc. What is your job description – what will you be doing, who will you work with, where do you fit in, etc.?*
Through my first week here I was able to build an understanding of the company in my definition. Redhat is an open source distribution company that provides software companies with necessary tools to build their own operating systems that they are able to define and make changes to according to their needs. The structure or motto of this company is inspired by collaboration and one of the core values here is that we all benefit if we share knowledge hence the reason why we are an open source company. The customers tend to be mostly other software companies who offer these tasks to red hat because of the image of the company and the trust they've built up. My job description is a high school intern. This program is designed to give us insight into the various components of the company from technical and IT to finance and marketing as well as values and what we do at Redhat. We will have job shadow and networking opportunities.

Additional Wake County prompts

Students completing the internship program for Wake County schools must also complete the following prompts IN ADDITION to the 'All-student prompts'

| |
|---|
| **Prompt 1:** *Describe your orientation of the workplace and include the following: when did it occur, who did you meet with, and what are three key things you learned during the orientation?* |

Export + contribute your reflection

Stop here! You will complete the steps below during your Week 2 GitHub lab

1. Once you've filled out the above prompts, export this doc as a PDF. Note: make sure you rename the file to be in the format `[Firstname Lastname] Week 1 Journal Entries`

2. Now that you have a PDF of this week's reflections saved locally to your laptop, you should contribute the PDF to your personal GitHub dropbox area in [our shared repo](#).
