Week 1 – Career Development

Journal entries

All-student prompts

All students should reflect on and respond to the following prompt(s):

> *Prompt 1: **Describe your orientation of the workplace and include the following: when did it occur, who did you meet with, and what are three key things you learned during the orientation?***

On the first day, David and Sean took us around the office from floor to floor showing us the gym, various pantries, the EBC, and more. I learned that there are bathrooms on each floor, we have to scan into each floor, there is a gym downstairs that we can get access to at the front desk, and that the food on each floor is available to us. We were also told to be quiet outside of the instruct lab and not to enter the EBC.

> *Prompt 2: **Define the purpose of the business/organization – what they do, structure, who are their customers, etc. What is your job description – what will you be doing, who will you work with, where do you fit in, etc.?***

Red Hat is an open source software company that sells subscriptions to services and maintenance of their open source technology. Their customers include various tech companies that want help implementing open source technology and red hat helps these companies by teaching how to edit and improve the code to fit the need of the company. As a high school summer intern, I will be job shadowing people around the workplace working with software, engineering, coding, data, and some of the business operations of the company to learn a little bit about what red hat does and how they do it. I will work with some full time associates, a lot of the people team, and with my fellow high school interns. My role is a learning one where I will be of assistance to whoever when I am shadowing them, yet my goal is to learn from them about what they do and why their role is important at red hat.

Additional Wake County prompts

Students completing the internship program for Wake County schools must also complete the following prompts IN ADDITION to the 'All-student prompts'

> *Prompt 1: **Describe your orientation of the workplace and include the following: when did it occur, who did you meet with, and what are three key things you learned during the orientation?***

Export + contribute your reflection

Stop here! You will complete the steps below during your Week 2 GitHub lab

1. Once you've filled out the above prompts, export this doc as a PDF. Note: make sure you rename the file to be in the format `[Firstname Lastname] Week 1 Journal Entries`

2. Now that you have a PDF of this week's reflections saved locally to your laptop, you should contribute the PDF to your personal GitHub dropbox area in [our shared repo](#).
