Week 2 – Technical Labs

Journal entries

All-student prompts

All students should reflect on and respond to the following prompt(s):

> *Prompt 3:* **How has your classroom experiences prepared you for the internship? What do you wish you had learned prior to the internship?**

I had the opportunity to take technical/ STEM classes at my high school and there are networking opportunities provided by the clubs and associations I am in. My teachers allow for a lot of personal exploration of our interests so I've been able to create coding projects even in my english classes. Being completely transparent, there is nothing I really wish I had learned prior to this internship because this opportunity covers the foundations/ beginning of everything so I never felt lost or left behind in any way.

Export + contribute your reflection

1. Once you've filled out the above prompts, export this doc as a PDF. Note: make sure you rename the file to be in the format `[Firstname Lastname] Week 2 Journal Entries`

2. Now that you have a PDF of this week's reflections saved locally to your laptop, you should contribute the PDF to your personal GitHub dropbox area in our shared repo.
