# Week 3 – All About Data

Journal entries

## All-student prompts

All students should reflect on and respond to the following prompt(s):

| **Prompt 5:** *How is the internship meeting or not meeting your expectations/objectives and why? Do you have control of this? Explain.* |
| --- |
| This internship is exceeding my expectations in terms of the resources they are providing for us to engage with experts with technical backgrounds. I have been able to take initiative on my own and meet with members from the AI team and learn about their skills, backgrounds, and the technologies they use which has helped me greatly with my own career. I think that Red Hat could enhance their program by making the lectures more interactive or adding more technical components. I don't have control over the curriculum but I have the ability to give feedback. |

| **Prompt 6:** *How has this experience affected or changed your career/college plans?* |
| --- |
| I have always been set on my college plans to pursue a combination of computer science and finance and this experience has reinforced that vision. I really enjoyed getting to engage with people who are involved in those respective industries and they have given me a greater appreciation of them because of how passionate they seem regarding their work which just makes me even more enthusiastic to learn more about those topics in college. |

# Export + contribute your reflection

1. Once you've filled out the above prompts, export this doc as a PDF. Note: make sure you rename the file to be in the format `[Firstname Lastname] Week 3 Journal Entries`

2. Now that you have a PDF of this week's reflections saved locally to your laptop, you should contribute the PDF to your personal GitHub dropbox area in our shared repo.
